What is Aadhaar Enabled Payment System (AEPS)?

- Aadhaar Enabled Payment System (AEPS) is a banking payment system that is based on the Unique Identification Authority of India (UIDAI), is an agency of the Government of India. AEPS is a way to make a financial transaction from the bank account with the help of your biometric authentication. This system neither requires your signature nor one-time password (OTP). The AEPS aims to empower all sections of the society by making financial and banking services available anywhere anytime to all through Aadhaar Based. Aadhaar Enabled Payment is not only an Aadhaar Based Payment system through which you transfer your funds, make payments, cash deposit, cash withdrawals, balance inquiry anywhere anytime by authenticating fingerprint. AEPS allows customers to make payments using their Aadhaar number and by providing Aadhaar verification at the Point of Sale (POS) or micro ATMs.

What is AEPS White Label Portal?

- White Label indicates that it has no label. You can easily label it for yourself. We at Dogma Soft provide Aadhaar Enabled Payment System White Label Portal. You're Own Brand, Your own Domain Name and Your Own Logo choose your own website color combination and write your own company information in about us, contact us and other pages. We will provide an admin panel, with your admin control panel you can create unlimited super distributors, distributors, retailers. We do not provide AEPS Service only, but we also provide a complete business solution for your business which includes 100+ IT Services.

Few Facts About AEPS White Label Software and API:

- It is a very good idea to start your own AEPS, Money Transfer, Mobile recharge Portal. Developing your own B2B portal helps you to easily create and maintain Retailers, Distributors and Master Distributors but developing your own B2B Portal is not that easy task. It consists a few complex phases:
- Software Development
- API Integration
- Application Development

You also need a technical person to look after your software and server. In white label solution, the company will provide you a ready-made portal with your own brand. It is also managed by our team so you don't need any such technical knowledge. You just need to focus on marketing segment rest will be handle by our experienced team.

Services included in our AEPS White Label Portal:-

- Mobile Recharge White Label Portal
- DTH Recharge White Label Portal
