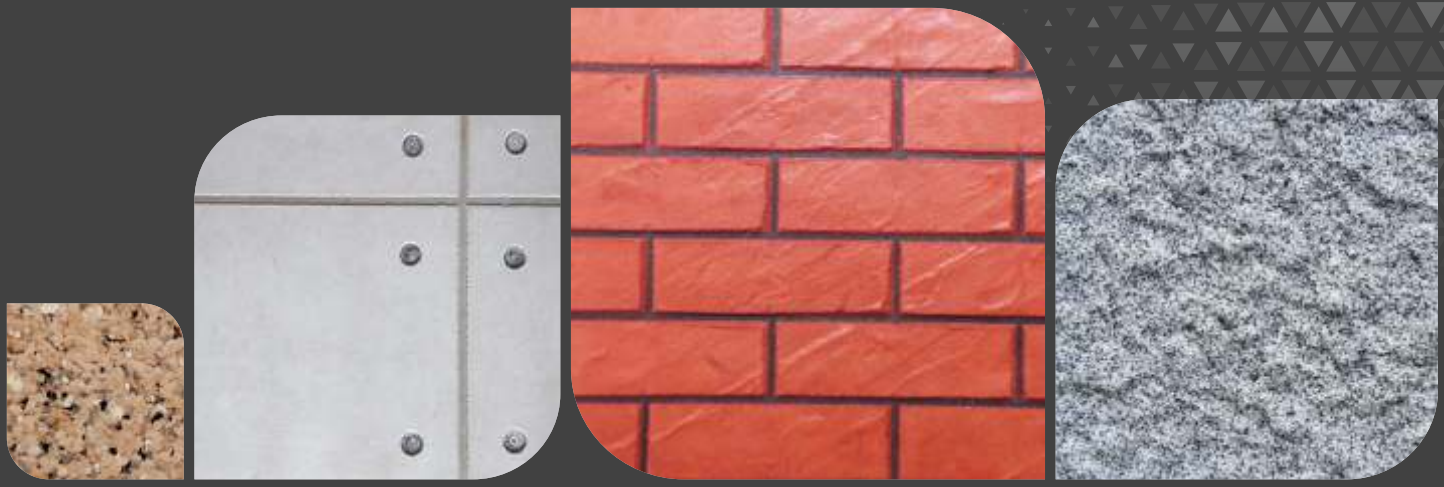
We are a team of young and dynamic individuals working together, we focus on what's more important & leave the mark of Balaji Wall Texture LLP in whatever we do.



CONCRETE FINISH TEXTURE FOR EXTERIOR

DESCRIPTION

- Concrete Finish Texture is composed of a mix of elements: Portland Cement, hardest earthen material, Special additives, Natural grains and special polymers to create eternal beauty, aesthetic value and heritage effects.
- Concrete Finish Texture is a self-drying, trowel applied finish for walls, Floor and ceilings.
- It requires 3 coats & 1 protective sealer coat, for better result depending on actual base of surface.
- Thickness : 2 mm to 3 mm.

USES & APPLICATION : It can be used to produce a high-end and contemporary creative cement wall surface in areas such as commercial businesses, large public spaces, retail stores, shops, hotels, cafés, vestibules, and residential applications.

There are five basic steps that take you through design, colour, texture, patterns, and protection. So you can create the space you want and know it's going to last.

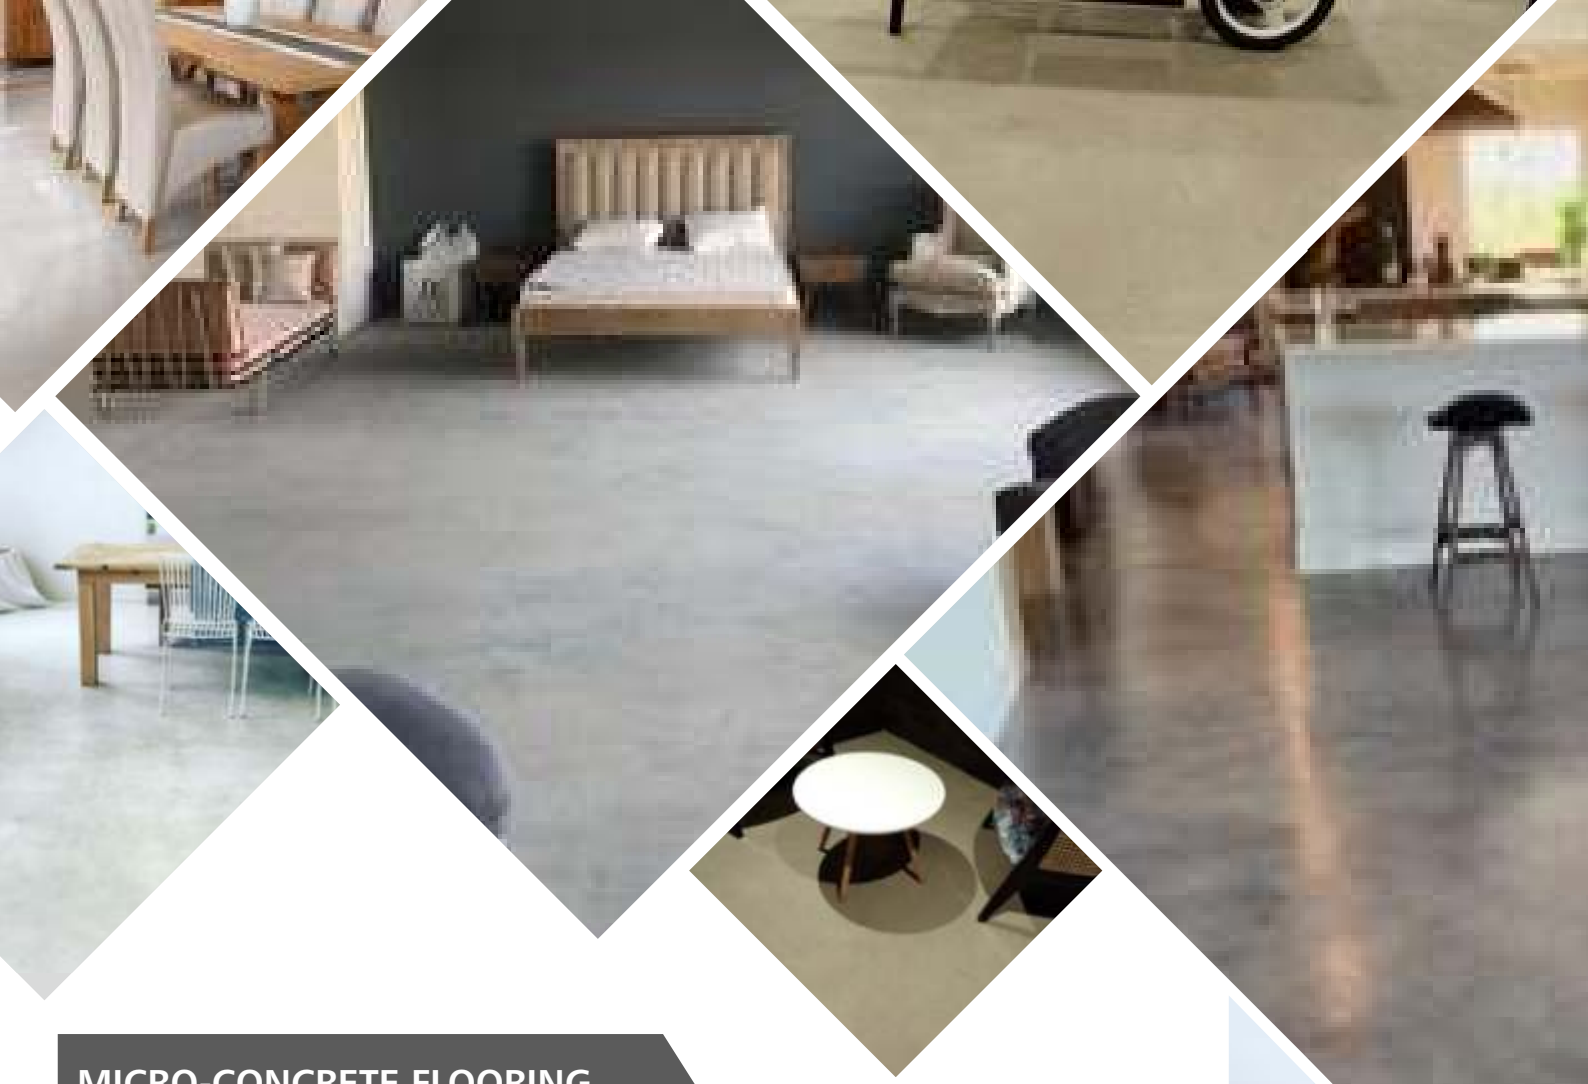
CONCRETE FINISH TEXTURE FOR INTERIOR

FEATURES

Concrete Finish Texture is a simple and durable texture coating, suitable for both interiors and exteriors. It is easily applied on-site and is moulded directly onto various types of surfaces, catering to the shape of your wall.

Concrete Finish requires very minimal maintenance and is only composed of top quality ingredients. Also, it retains strong resistance against cracking, water seepage and rough weather conditions.

Choose from our selection of patterns and shades to bring the stark elegance of simple concrete to your home or office space.



MICRO-CONCRETE FLOORING

BALAJI GRANITE FINISH TEXTURE

What is Granite Texture?

"Granite Flakes Texture" is a textured surface coating material. It comes in three packs, comprising Dry Granite Flakes, Bonding Agent and Top Coat.

- Dry Granite Flakes are made from China Clay, Pigments (chiefly inorganic), homo-polymer emulsion, mica, etc.
- Bonding Agent is made from pure acrylic emulsion, broad-spectrum fungicide etc.,
- Top Coat is based on pure Acrylic polymer, which is dissolved in a solvent medium.

Granite Finish Texture is suitable for both interior and exterior applications. It offers easy pliability, unlike real Granite and can be used in nooks, corners and contours.

Also the weight on the building is effectively nil in case of "Granite Finish Flakes", whereas the actual Granite Stones add on a heavy weight to the building.

We can customize as per requirements. We can match any kind of Natural Granite & offer you replica of that Granite.

BALAJI GRANITE FINISH TEXTURE

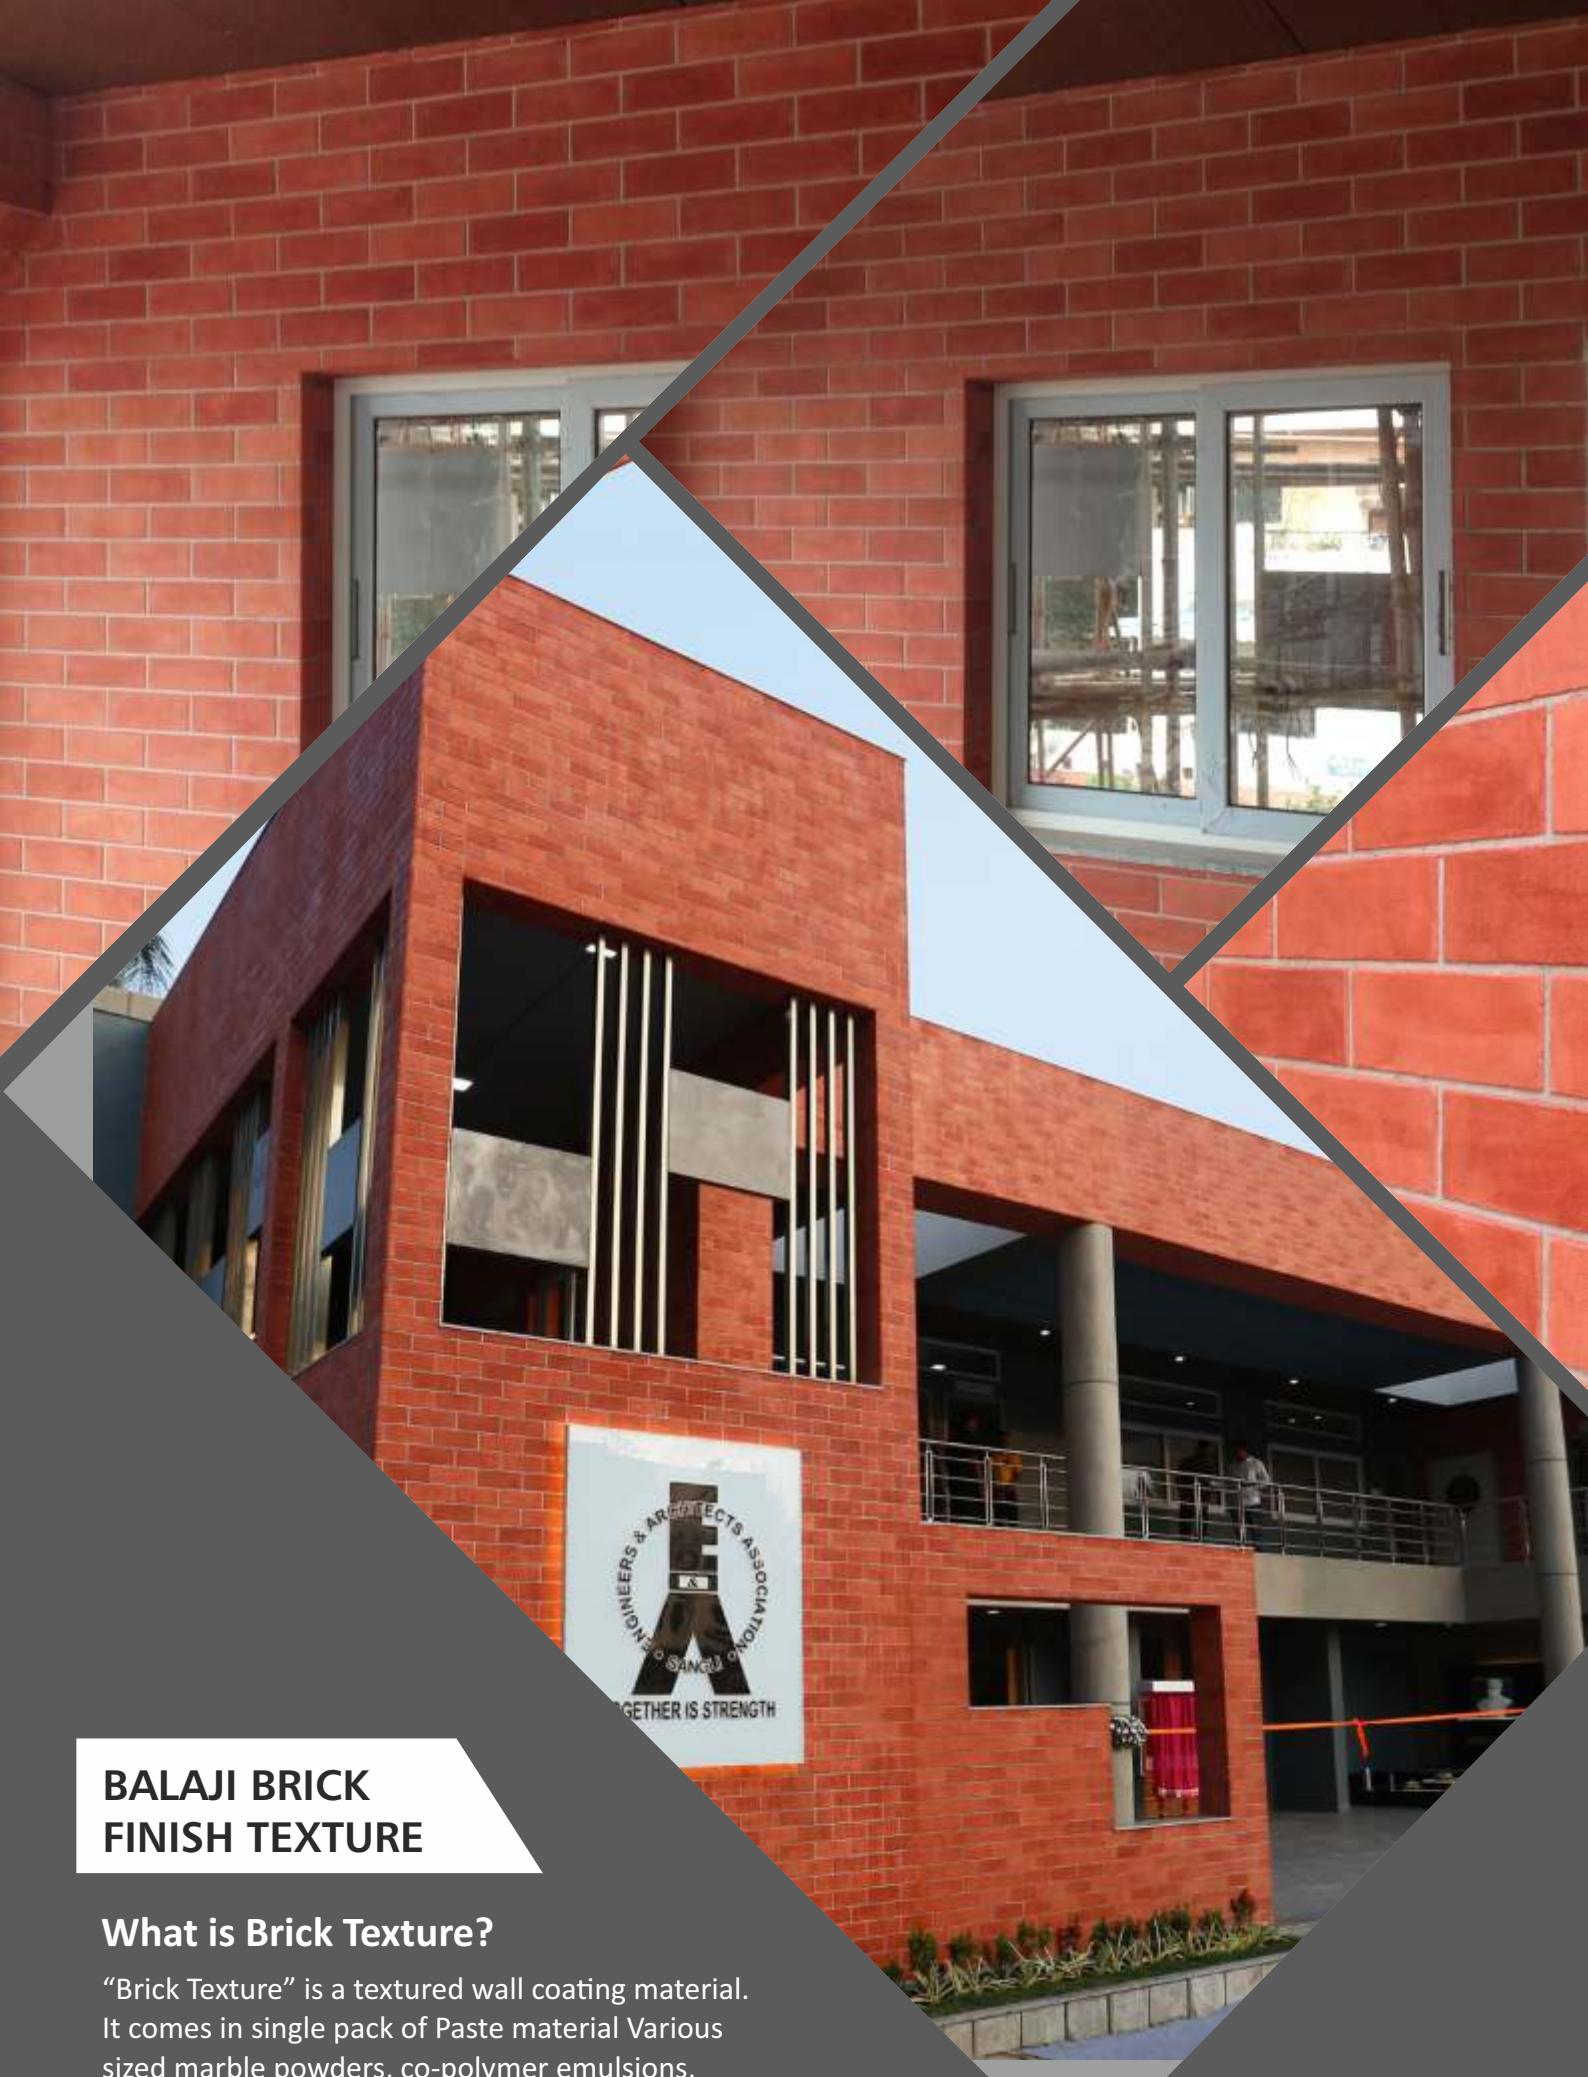
THICKNESS : 1.0 mm to 1.5 mm.

FEATURES & BENEFITS:

- Granite Texture is suitable for interior and exterior applications.
- Easy to apply and can be applied on all absorbent surfaces..
- Aesthetic and durable.
- Needs only a single coat for even multi colour combinations.
- Water Resistance
- Adhesion strength
- Abrasion Resistance

USES & APPLICATION:

- Colleges / Institutes.
- Government Buildings.
- Hospitals.
- Factories.
- Commercial Complexes.
- Public Buildings.
- Farm House.
- Villa / Bungalow.



BALAJI BRICK FINISH TEXTURE

BALAJI GRANULES TEXTURE

What is Granule Texture?

THE VERSATILE FINISH OFFER THE ULTIMATE COMBINATION OF DESIGN FLEXIBILITY.

"Balaji Granules Texture " is a great way to spruce up any interior space & exterior appearance. The dry granules are mixed with bonding agent with recommended quantity of water. The dough is then trowelled onto the substrate to be coated to get an average dry film in the range of 0.8-1.2 mm.

Balaji granules are suitable for both interior and exterior applications. They offer the unique option of mono or multicolour shades in a single coat.

BALAJI STUCCO TEXTURE / DHOLPUR STONE FINISH

A great alternative of natural stone for Wall Cladding.

Dholpur Stone Finish Texture

Premium Stone Design Texture: More Depth, More Detail, More Extravagance. Stone finish texture provided so many possibilities, when it comes to great looking home. There's the color, profile and texture of stone.

Attention to detail focused on doing little things to perfection. Look close & you will see Stone texture offers you the kind of craftsmanship, beauty and reliability that bring big ideas to breathtaking reality.

The quality is too good, after application of stone finish texture looks as "It is real stone"
