

DHARMANANDAN TECHNO PROJECTS PVT. LTD.

DTPPL

*Has Solutions For
The Problems To
Achieve Customer's
GOAL.*

Are You not getting Pure water ?

Are you Tired off by manual filling ?

Are You Not getting High Production ?

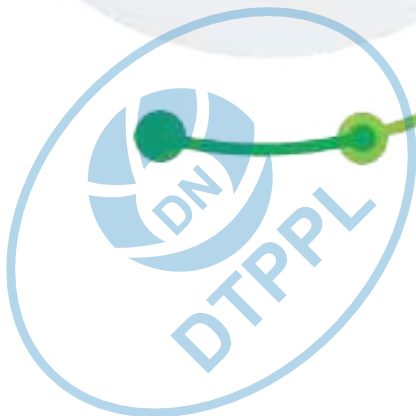

Not getting Bottle supply in time ?

Are You looking for new Profitable Business ?

Need more Information on Mineral water,
Soft Drink, Juice, business ?

Our Success Story

DHARMANANDAN TECHNO PROJECTS PVT. LIMITED (DTPPL) is founded by the finest and widely experienced Technocrats having experience and proven expertise in the Field of Water Treatment, Drinking Water Plant and Packing machines.

It was humble beginning way back in 2007. However we have long experience in water treatment and drinking water Industry. We started with very small unit for fulfilling the Technical Requirements of the water treatment industries mainly of Packaged drinking water. We were supporting our clients for improving their water quality and guiding them for quality assurance of the Packaged drinking water. Initial days were very tough. We were literally struggling for getting the business. Customers were reluctant to buy from us. We literally worked free of cost for many initial clients. Our struggle continued quite a long time. Survival of the business was very difficult.

However, we were committed to our service and we never compromised on our quality and commitment for the customers. We continued hard work of serving and helping our customers and at the same time we were learning many essential and vital things which are necessary to satisfy the clients. Our total focus was on the Quality and service so that we can fully satisfy our clients beyond customer's expectations. Eventually our hard work and commitment has started paying off. Our happy and satisfied customers were growing at steady pace. These happy customers became our inspiration and motivation to work more hard. Sooner we started manufacturing of RO plant and Automatic Filling machines. Being having Engineering background, manufacturing was not tough task for us. However, there were also initial struggle for setting up best quality machines which we overcame by investing on latest technology in manufacturing and hiring competent and experienced technical manpower.

We multiplied our business to manifold by single customer centric policy i.e. **"ONE HAPPY & SATISFIED CUSTOMER GIVES 10 MORE CUSTOMERS"**. Our list of Happy customer is growing rapidly and DTPPL is strengthening day by day by spreading the client base geographically all over INDIA. We also have global footprint in **Countries like Bhutan, Columbia, Togo, Ghana and many African countries.**

Today, DTPPL is one of the Biggest manufacturers of Water treatment and Packaging machines in INDIA with total customer centric approach. DTPPL has Manufacturing Facility spread over 20,000+ square feet with state of the art latest technology. DTPPL is totally committed to 100% Customer satisfaction with quality and service and DTPPL is confidently aim to become INDIAN corporate giant in the coming future. DTPPL's Mission by Heart is **"MAKING PEOPLE MORE SUCCESSFULL AND PROFITABLE IN MINERAL WATER BUSINESS"**

About Mineral Water Industry

Water shortage and health awareness driving bottled water consumption in India. The Indian market is estimated at about Rs 6,000 crores and is growing at a whopping rate of 40 per cent. By 2020, it will reach More than Rs 8,000 crores with 33 per cent market for natural mineral water. According to a national-level study, there are more than 400 bottled water brands in India and among them nearly 80 percent are local brands. India ranks in the top 10 largest bottled water consumers in the world. Bottled water is still not perceived as a product for masses, though the scene is changing slowly, thanks to low pricing and aggressive marketing strategies adopted by new entrants. Penetration in rural areas is another significant factor that is likely to play a key role in the development of the bottled water trade. The level of prosperity in the different regions plays a key role in the consumption of bottled water in India.

THIS IS WHY WE ARE

- AN ISO 9001:2015 CERTIFIED COMPANY
- IN HOUSE MANUFACTURING FACILITY
- IN HOUSE R&D DEPARTMENT
- MORE THAN 12 YEARS OF EXPERIENCE
- TEAM OF QUALIFIED PROFESSIONALS
- STATE OF THE ART TECHNOLOGY
- VERY LOW MAINTENANCE
- CLEAR QUALITY POLICY IMPLEMENTATION AT ALL LEVEL.
- MODERN & SUPERIOR EQUIPMENT
- MAXIMIZING VALUE FOR MONEY
- ROUND THE CLOCK SERVICE

DTPPL'S MISSION BY HEART

"Making People more Successful & Profitable in Mineral Water Business"

VISION

CORE IDEOLOGY

Core Purpose :

“To Bring Happiness in Human lives by Elevating Quality and Providing Revolutionary, Reliable & Innovative Solutions”

Core Values :

Customer
Delight

Commitment

Integrity

Innovation

Relationship

ENVISIONED FUTURE

Big Hairy Audacious Goal (B.H.A.G) :

To incorporate Great Practices of TATA Group and achieve turnover of 2000 crore by 2035.

VIVID DESCRIPTION

DTPPL will be Highly Aadmired, Highly Respected & Recognized, Most Sought after Number 1 Brand in our Segments.

DTPPL will be having Highly Qualified, Experienced, Dedicated, Committed, Energetic & Enthusiastic Employee family strength of 1000.

DTPPL's manufacturing facility will be spread Over 5 lakh square feet constructed area and 3 lakh square feet open Area. This Facility will be Environment friendly & will be equipped with world class, state of the art latest technological manufacturing machines.

DTPPL will Ensure Entire Social security of All the Employees so that they can work Tension Free.

DTPPL will be having world class, Hi-tech, Environment-friendly and Employee friendly corporate office in Surat.

DTPPL will be having Network of 250 Distributors all over the world.

DTPPL will be having Skill Development University in Surat and will serve under privileged peoples to explore their True Potential in becoming Great Working Human being.

DTPPL will be having branches & service offices in All States of the India.

DTPPL will be listed in NSE, BSE and NYSE.

DTPPL will be having 30 Branch offices at different foreign locations outside India.

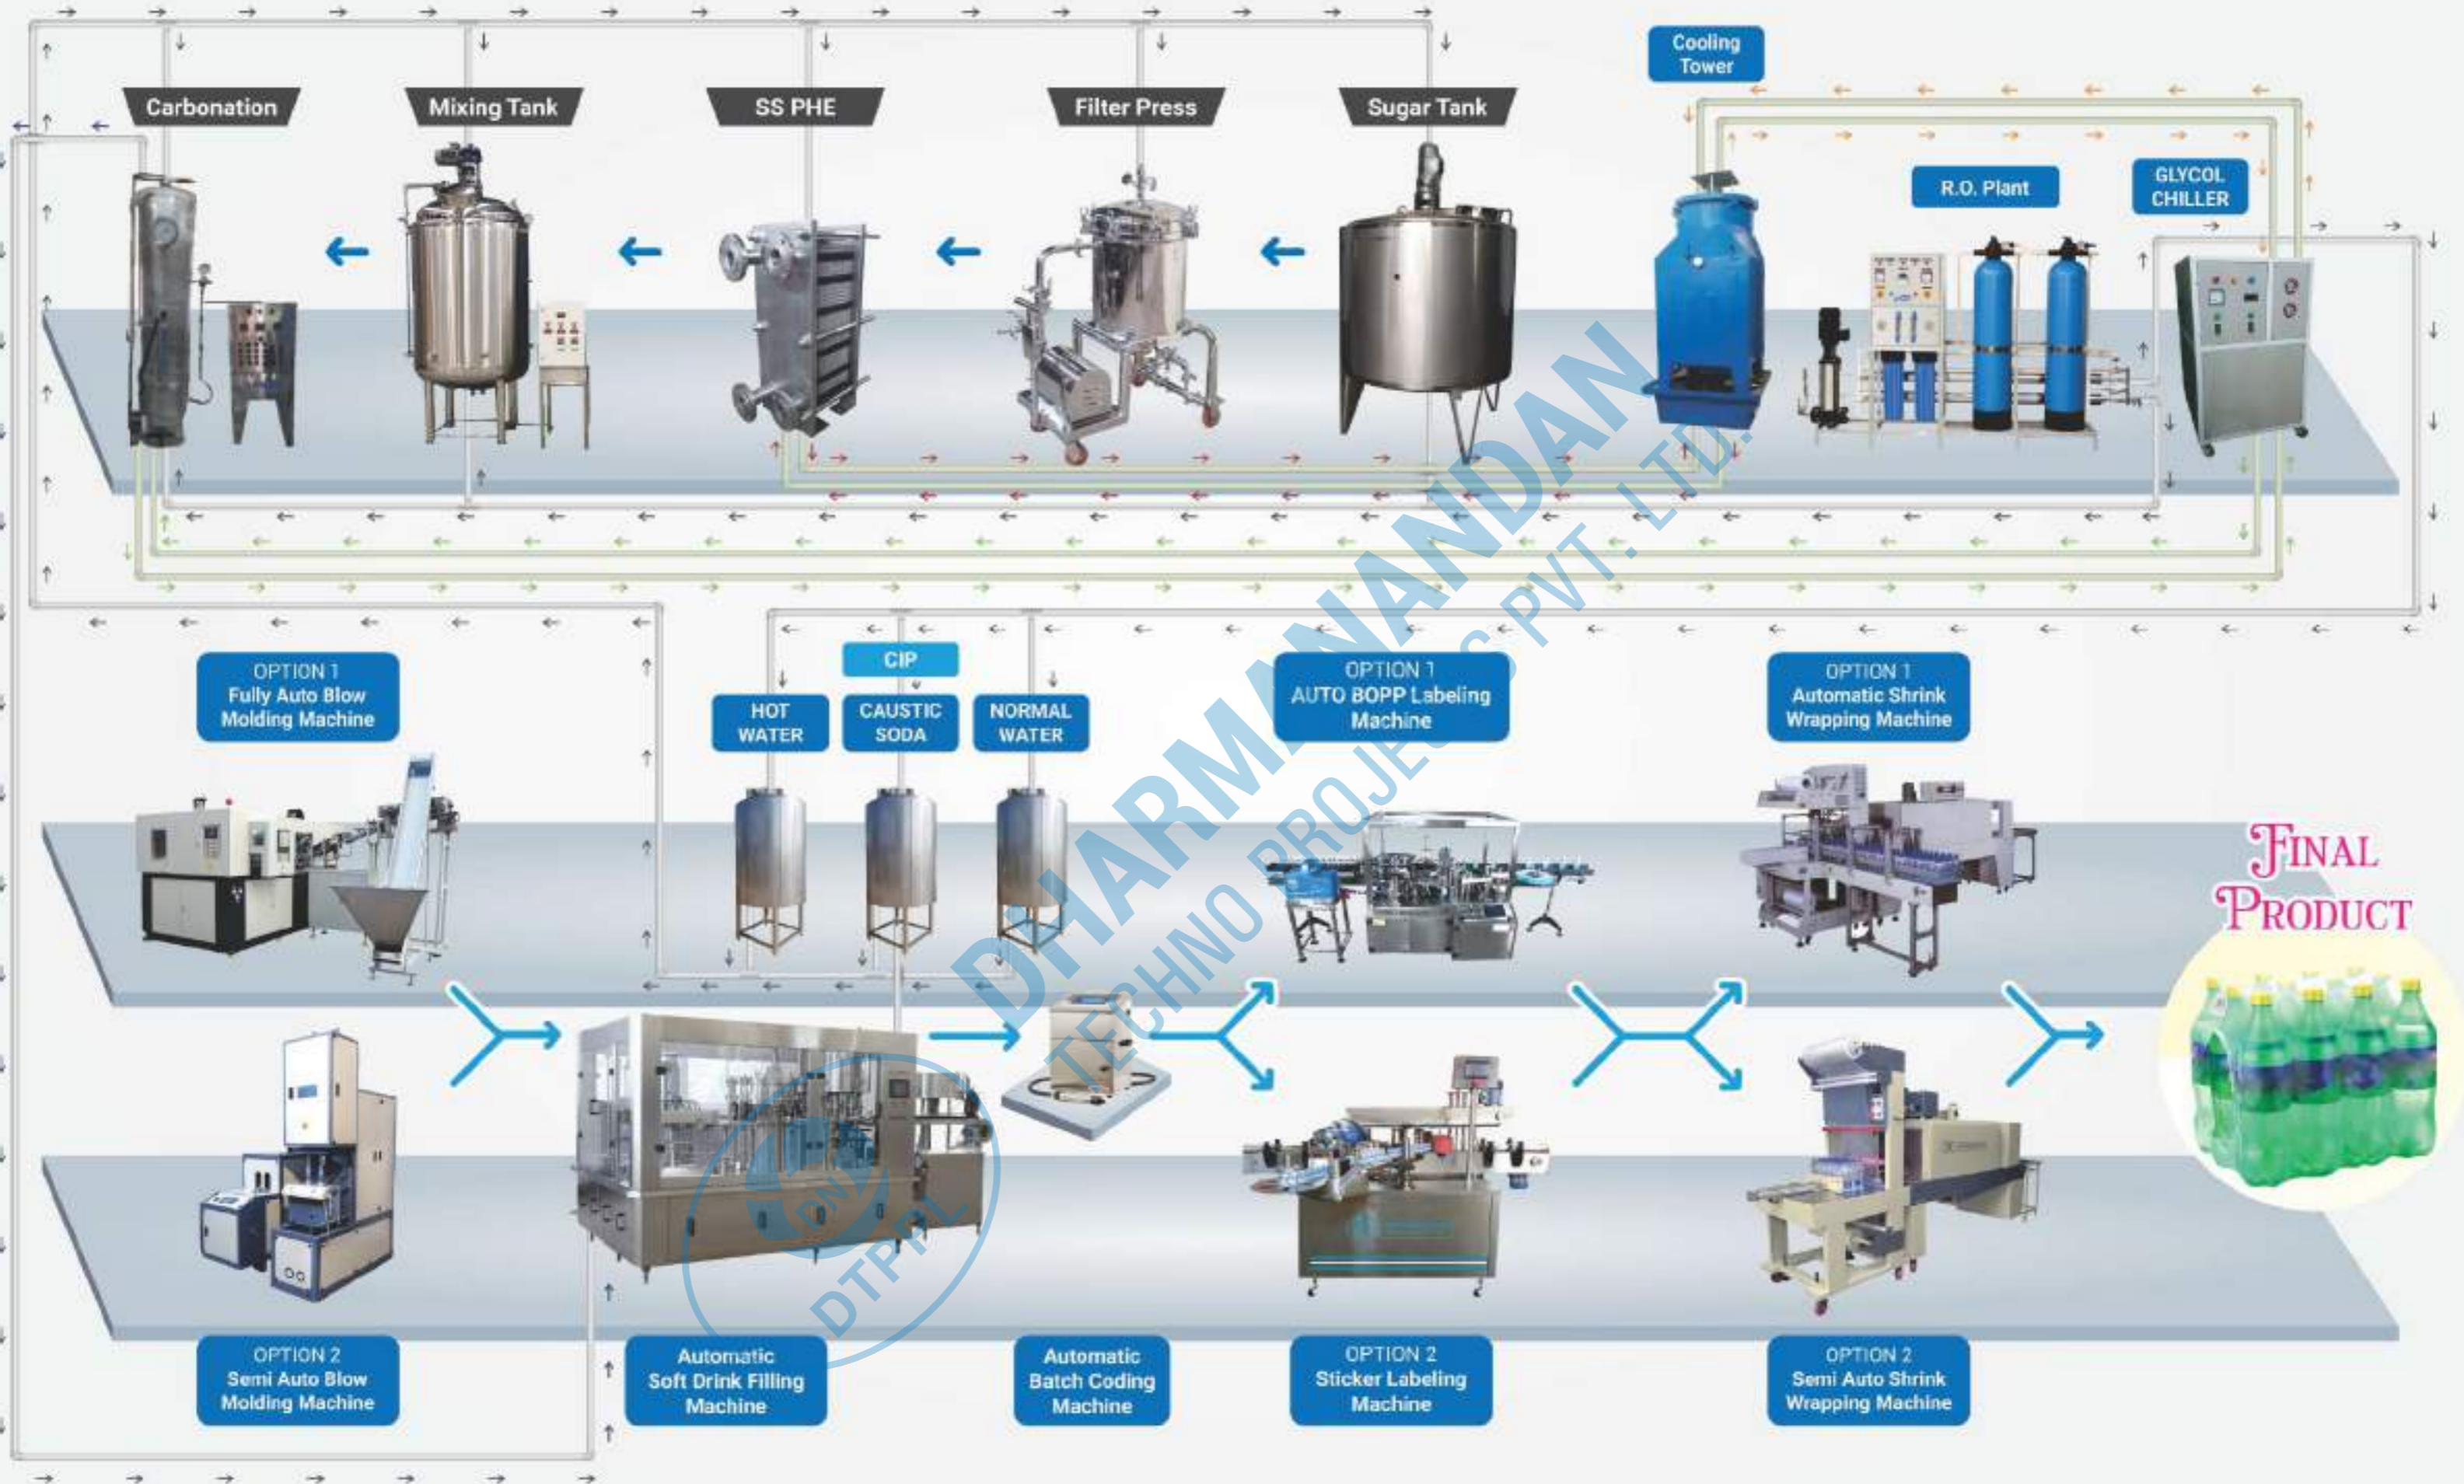

DTPPL will be Top rated by various rating agencies like CRISIL, CIBIL etc.

DTPPL'S State of The Art Manufacturing Unit

DHARMA NANDAN
TECHNO PROJECTS PVT. LTD.

*Your Success Story
Will be like this....*

R.O. PLANT

We design customized water purification RO plant as per raw water quality. Our Plant comes in different design including FRP, SS, ISI, Non ISI, Commercial, Industrial.

Capacity of this plant starts from 250 Lph to 20,000 Lph & More ...

We Have Developed different technology to enhance the quality & Taste of water like - **Added mineral, Ozonation, Oxygen Maker, Spring, EMF, GAC, Silverisation, Vitamin Technology etc..**

SS R.O. Plant - ISI (Premium Model)

BENEFITS OF DTPPL's RO PLANT

- ✓ Scientific design of the RO plant, based on Impurities of the Raw Water, Ensures consistent quality of the water and imparts more confidence in Water Quality.
- ✓ High thickness Stainless steel of Repute Make like **Jindal, Essar, Tata** gives excellent strength and gives enjoyment of long life and good return on investment.
- ✓ Simplified Control panel design ensures ease in operation and benefits of low breakdown and less down time
- ✓ DTPPL's Advanced Value added technology improves the **taste of the water** which helps in gaining more and more loyal clients thus helping in building BRAND & High Business **Growth in mineral water business.**
- ✓ DTPPL's RO plant is equipped with Branded Electrical Accessories which ensures the machine's optimum performance with advantage of very low breakdown and higher productivity.
- ✓ Fully Automatic Design helps Reduce Labor Cost.
- ✓ Inner Food Grade Coating Gives Added Strength, Corrosion Resistance & Benefits of Long Durability.
- ✓ Added Mineral Technology (Optional) Gives Sweet & Rich taste to the water Which Provides Advantage in Marketing & Building BRAND Image.

AUTOMATIC BOTTLE WASHING, FILLING & CAPPING MACHINE

60 BPM

120 BPM

24 BPM

30/40 BPM

BENEFITS OF DTPPL'S AUTOMATIC BOTTLE WASHING, FILLING & CAPPING MACHINE

- ✓ Advanced Mechanical design makes machine highly sturdy which gives Vibration free operation, Easiness in maintenance and long life and duration & Value for Money.
- ✓ Major Electrical Parts are of Repute Make L&T, Schneider, Siemens which Prevents Short Circuit and hence benefits of low breakdown and smooth in Operation.
- ✓ Bottles are handled by Neck only which gives Tremendous flexibility in filling the different Capacity bottles in single Machine without changing any parts.
- ✓ Pick & Place Technology (Optional) makes the capping operation much easier which ensures low rejection of caps and better capping Performance and overall Controlling cost of production.
- ✓ Overload Protection Technology (Optional) Protect the machine from accidents and provides enhanced safety in operation and enhance the life of the machine.

BLOW MOLDING MACHINES

Jar Blowing Machine

Hand Feed Auto Blowing Machine

Fully Auto Blowing Machine

Semi Auto Blowing Machine

BENEFITS OF DTPPL'S BLOW MOLDING MACHINE

- ✓ PLC control gives Ruggedness to withstand Vibrations, Temperature and Humidity and benefit of consistent quality of the Bottles.
- ✓ PLC is easily Programmable which gives Easiness in operation and Operator becomes more confident in operation which results in High output of the machine
- ✓ Accurately Programmed PLC Eliminates Human Error and Manual Intervention hence benefits of high accuracy and best quality of the Bottles
- ✓ Digitally Controlled Chilled water circulation nullifies the effect of temperature on Neck of the bottle which reduces chance of neck bending and hence benefits of very low rejection ratio and low production cost.
- ✓ Auto Lubrication Technology (Optional) eliminates laborious manual lubrications which will give benefit of lowest breakdown of the moving part without any hassles and very fast production
- ✓ Indexing Technology in Auto blowing Machine Eliminates requirement of Frequent Alignment of the Preform Rotating system and thus gives low maintenance and Maximum production.

POUCH PACKING MACHINES

BENEFITS OF DTPPL's POUCH PACKING MACHINE

- ✓ Base plate of 6MM thickness makes machine sturdy and machine can be lifted & transported easily without any damage. There are No chances of mis-alignment of Gearbox and Cam
- ✓ Machine comes with ALPRA - Germany Make gearbox which is designed for Heavy duty operations of Horizontal movement which gives benefits of long life, smooth operation and very low maintenance and very low breakdown
- ✓ Major Electrical Parts are of Repute Make (L&T) which Prevents Short circuit and hence benefits of low breakdown and smooth in operation
- ✓ Machine comes with Buzzer which gives intimation of set production batch and ease in Bag Packing
- ✓ Machine comes with hour meter which provides the details of total running hour and hence production data can be calculated easily.
- ✓ Heavy Duty Vertical Sealing Jaw & Horizontal Piston Provides Accurate sealing of Pouches without much noise which gives LEAK PROOF POUCH and very low rejection ratio
- ✓ Camshaft comes with Needle Bearing which is very long lasting and hence low consumable cost
- ✓ Magnetic Coil (in Milk Pouch Machine) gives accurate dispensing of the liquid and excellent reproducibility of the Pouches
- ✓ Milk Pouch packing Machine comes with PLC which is a one stop control of entire machine hence provides error free, accurate operation. Machine becomes truly operator friendly since they do not have to change settings repeatedly.
- ✓ Volumetric Injection Filling Technology (in Oil/Ghee packing Machine) provides accurate weighing and hence batch to batch high accuracy is achieved
- ✓ Heavy Duty Male-Female Sealing Jaw (in Oil/Ghee packing Machine) give zero error in sealing and hence zero leakage and accurate sealing
